The Problem Statement

1. With an overwhelming statistics of Unemployment and self dependence across multiple countries, The exclusion spikes even a higher point more especially in vibrant and important sectors like Health Services.
2. The excluded unemployed and low earners are suffering the pain while in a honest fact the ones needing those services that any other. This solely contribute to high loss of lifes. lack of life and health insurance even fuel it the worst. people are not attended by private service personnels in times of emergencies, due to not having health insurances.
3. Lack of AI and inclusives plans and payment services even makes the issue even persistent.

Solution

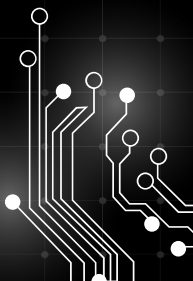

We introduce to you **inclusiV** an AI infused chatbot with everything needed to actually beat exclusion and counter problem for disadvantaged persons. integrated with the most seamless payment system one can think of.

Our aim

Our steady aim is to root out the disturbing exclusion happening to the majority disadvantaged persons and include best cater to eliminate the bold and visible separating border between needy and the affording. utilizing AI for this is just ideal.

The goal

Our goals is to to be the bridging factor to eliminating or compressing the exclusion by using the most productive and vibrant AI sector and payment system that really cater to the uncatered.

Solution Content

MediRescue micro-health insurance

- View plans (Basic/Plus) and enroll via Insurance Agent
- Show cover, waiting period, remaining annual cap
- Start emergency transport workflow, issue medicine vouchers
- YellowBucks bonus contributes to MediRescue wallet (advisor guidance)

Business Research & Locator

- Web research, store/location lookup, information discovery
- Uses MCP browser tools (with LLM fallback)

Provider verification (MediRescue)

- Verification form (ID + optional phone) rendered as modal
- Routes to Insurance Agent to verify member status (VERIFIED/NOT VERIFIED)

MTN MoMo transactions

- Balance check, send money, airtime/data purchase, payments
- Auto ZAR handling (sandbox EUR hidden), transaction reference IDs
- Mandatory pre-transaction confirmation card

MediRescue Advisor

- Plan comparisons, budget-fit guidance, waiting period and voucher rules
- Explains YellowBucks-to-wallet contribution
- Defers enrollment/verification to Insurance Agent

Architecture & ops

- Agent-to-Agent (A2A) HTTP JSON-RPC orchestration
- Agents on separate ports (MoMo 9999, Advisor 9998, Insurance 9996, Research 9997)

- **THINK OF AI IN ITS BEST**

Business Thesis

- **Bold mission:** turn everyday MTN MoMo usage into instant, affordable access to emergency health protection.
- **Core value:** remove friction and risk in mobile transactions and provider verification to build trust and usage.
- **Wedge:** ultra-simple micro-insurance (MediRescue) embedded in MoMo flows with real-time verification and confirmations.
- **Monetization:** recurring premiums (Basic/Plus), transaction fees, partner commissions, and Sponsored/affinity plans.
- **Flywheel:** YellowBucks → wallet top-ups → higher coverage continuity → better outcomes → stronger retention.
- **Differentiation:** agent-to-agent orchestration, mandatory confirmations, ZAR-first UX, provider-ready verification tools.
- **Expansion:** upsell (vouchers, higher tiers), cross-sell (data/airtime bundles), regional replication with local partners.
- **Proof/KPIs:** conversion to plans, claim response time, coverage continuity, verified-provider success rate, premium ARPU.

Functionalities

- Buy data/airtime with mandatory confirmation and reference number.
- Compare MediRescue plans, enroll, and view cover/waiting days.
- Provider verifies a patient on-scene (ID/phone) and gets immediate status.
- Start an emergency transport request; receive dispatch confirmation.
- Receive medicine voucher after a no-claim cycle.
- Apply YellowBucks bonus to top up the MediRescue wallet for affordability.
- Look up nearby stores or relevant info via research/locator.

Conclusion

inclusiV, with MediRescue micro-health cover, turns everyday MoMo activity into safe, simple access to emergency protection. With real-time confirmations, provider verification, and clear MediRescue guidance, it builds trust and speeds help—kept in familiar ZAR inside a modern chat.

AI speed.. cheers
